

GIBBS PEDESTRIAN BRIDGE PROJECT

SW Gibbs at Kelly Pedestrian Crossing

Option 1 Concept

North Side SW Gibbs Street Bridge Landing

- Relocate parking lot driveway for NE corner property. An additional 4 parking spaces are gained.
- A north side bridge landing on Gibbs precludes north side property access and on-street parking. Southside properties and on-street parking are unaffected.
- A north/south crosswalk with an east/west stop sign and an east/west crosswalk with a raised median refuge island provides pedestrian access from the bridge landing. The raised median will require removal of approximately 90 feet of parking along both sides of Kelly south of Gibbs.
- A curb extension on the NW corner of Gibbs and Kelly will help direct northbound Kelly traffic through the intersection. Pedestrian travel on the north leg of the intersection will be prohibited.
- Concrete or brick crosswalks are conceptual only.
